6-Day Online Certificate Course in Maritime Law

February - March 2026 (Online)

This intensive online course bridges legal frameworks with operational realities in the maritime domain. Delivered by a panel of seasoned experts—including maritime lawyers, marine scientists, and Academicians—the course emphasizes interactive learning and real-world application of maritime law across sectors

Course Overview

This five-day online course on Maritime Law is a practice-oriented program designed for a broad and multidisciplinary audience. It welcomes students, young academicians, early-career professionals, entrepreneurs, lawyers, researchers, auditors, and professionals from statutory authorities, as well as mid-level managers working in government departments—including those in maritime affairs, marine environment, fisheries, customs, immigration, and trade administration. The program is also relevant to individuals engaged in or aspiring to work in shipping operations, port management, logistics, maritime accounting and finance, or Blue Economy initiatives.

This course focuses on applied learning through high-level overviews, case studies, and interactive discussions. It provides a dynamic platform for upskilling, capacity building, and professional development across key thematic areas, including: The United Nations Convention on the Law of the Sea (UNCLOS), Shipping and carriage contracts, Marine environmental regulations; Admiralty and port law, International investment frameworks supporting Blue Economy growth. This course's uniqueness lies in its blend of legal insight with practical application, helping participants effectively engage with contemporary challenges in maritime governance, sustainable ocean management, trade facilitation, and regulatory compliance.

This course is useful for: Upskilling; Continuing professional development; Rapid familiarization with key maritime legal topics.

Salient Features

- Full access to all sessions and materials
- Certificate of Completion
- End-of-course quiz and answer key
- PDF handouts and visual summaries
