

IIT MADRAS
SCHOOL CONNECT PROGRAM

TEST DRIVE YOUR CAREER

EMPOWERING YOUNG MINDS. UNLOCKING CAREER PATHWAYS.

6500+
School partners

2.25L+
Student beneficiaries

Every choice a student makes, shapes what comes next

Students make important choices at every stage of their academic journey – choosing a stream in Class 11, selecting a degree after school, and eventually deciding on a career path. With each choice, the range of opportunities ahead can become narrower. That is why it is important for students to make these decisions with awareness, understanding and informed thinking.

The **IIT Madras School Connect Program** gives high school students a structured, experiential opportunity to make informed choices.

WHO CAN JOIN? Students of Class IX — XII

CLASSES IX — X
Find out what interests you, before choosing your stream **(Science, Commerce or Humanities)** in Class XI.

CLASSES XI — XII
Explore various fields through hands-on projects and then choose your **degree** based on your interests.

END-TO-END ONLINE LEARNING

- 8 weeks of recorded video lectures
- Bi-weekly Assignments
- Weekly Live Interactive Sessions

HANDS-ON PROJECTS

Students do a project and experience how the field works.

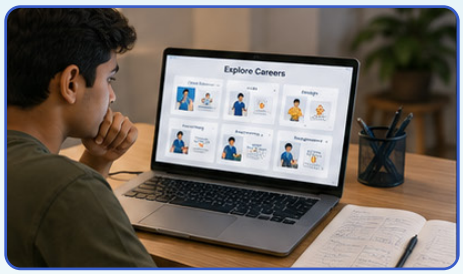

Grand event to felicitate top performing students and teachers at IIT Madras during summer.

Why School **Connect?**

Access to structured career counseling remains a rare luxury in most schools. **The IIT Madras School Connect Program** fills this critical void by exposing students to wide range of fields and career possibilities beyond traditional career paths. We provide the clarity, hands-on experience and the foundational knowledge students need to explore various opportunities.

Courses Offered:

MATH & SCIENCE

- Fun with Math and Computing
- Math Unplugged: Games & Puzzles
- From Statistics to Intelligence (For Classes XI & XII)
- Molecular Engineering: Opportunities and Challenges
- Our Defense System: How Our Body Detects and Defeats Invaders
- Introduction to Forensic Sciences – I (For Classes IX & X)
- Introduction to Forensic Sciences – II (For Classes XI & XII)

ENGINEERING

- Discover Engineering
- Introduction to Electronic Systems
- Introduction to Architecture and Design
- Introduction to Engineering Biological Systems
- Introduction to Product Design
- The Fundamentals of Aerospace

HUMANITIES & MANAGEMENT

- Economics, Finance & Money Matters
- Introduction to Law
- Humanities Unplugged
- Introduction to Digital Humanities

COMPUTING

- Introduction to Data Science & AI
- Game Tech Explorers: Understanding Humans, Machines & Play
- Introduction to Cybersecurity

Videos offered in English alongside regional Indian languages

How can a school **partner with us?**

01

Fill a **Partnership form**

02

Nominate a dedicated teacher as the **Single Point of Contact**

03

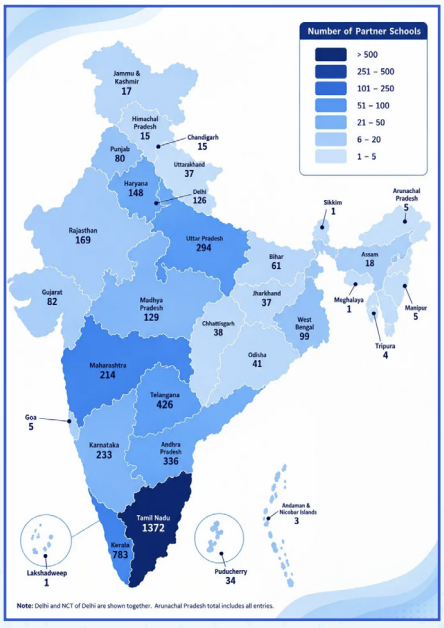

Monitor and **encourage** students to learn

04

Access data given in the **SPOC dashboard**

This is a non-commercial partnership between the school & **IIT Madras CODE.**

Our schools **partner across India** >>>

What students **should do?**

01

4 batches each year

Jan • Apr • Aug • Oct

02

Register

Fill the form

03

Course Fee

₹500 per course

04

Start Learning

Begin your journey

Bulk payment through the school is also available.

CERTIFICATES FROM IIT MADRAS

Students receive certificates

STUDENT PROJECTS

Hands-on learning.
Real-world impact.

Exclusive workshops for **school teachers**

Topics include:

- Hands-on STEM Activities for School Classrooms
- Interactive & Engaging Teaching Methods Through Games/Activities
- How Teachers Can Make a Difference?
- STEM Classroom Innovators Program (SCIP) – Physics, Chemistry, Mathematics, Biology

FEEDBACK

Introduction to Product Design : *Before this course, I didn't know much about product design. The examples and projects helped me understand what product designers actually do. It also helped me realise that this is a field I'm interested in and would like to explore further.*

Electronic Systems: *Taking the Electronic Systems program made me realise how much I actually enjoy this field. But by the time I discovered this interest, I was already in Class 12 and had chosen Commerce for Classes 11 and 12. Since I didn't take Physics and Maths, pursuing Electronics Engineering in college is no longer an option for me. I just wish I had explored this program when I was in Class 10. It could have helped me understand my interests earlier and make a different choice for Classes 11 and 12.*

Introduction to Law: *I was thinking about becoming a lawyer, but since both my parents are engineers, we didn't really know much about law as a career. That changed when I took the Law program through the IIT Madras School Connect Programme. I got to understand what the profession is actually like and even worked on projects that I really enjoyed. The experience gave me the clarity I was looking for. Now, I'm sure about my choice. I want to study Law in college and pursue it as my career.*
